

**MICHIGAN ELECTION LAW (EXCERPT)**  
**Act 116 of 1954**

**168.871 Recount; use of electronic voting system; use of voting machines; recount of absent voter ballots; procedures for conduct of recount; use of computer; testing software application.**

Sec. 871. (1) The board of canvassers conducting a recount pursuant to this chapter shall recount all ballots of a precinct using an electronic voting system unless 1 or more of the following circumstances exist:

(a) The seal on the transfer case or other ballot container is broken or bears a different number than that recorded on the poll book, the breaking or discrepancy is not explained to the satisfaction of the board of canvassers, and security of the ballots has not been otherwise preserved.

(b) The number of ballots to be recounted and the number of ballots issued on election day as shown on the poll list or the computer printout do not match and the difference is not explained to the satisfaction of the board of canvassers.

(c) The seal used to seal the ballot label assembly to a voting device in the precinct is broken or bears a different number than that recorded in poll records and the ballot labels or rotation of candidates' names is different than that shown by other voting devices in the precinct and records of the board of election commissioners.

(2) This section does not prohibit the recounting of absent voter ballots tallied in a precinct using an absent voter counting board or in a precinct in which 1 or more voting machines are recountable, if the absent voter ballots are securely packaged and sealed.

(3) If a board of canvassers conducting a recount pursuant to this chapter determines that the ballots of a precinct are not eligible for recount under this section, the original return of the votes for that precinct shall be taken as correct.

(4) A board of canvassers conducting a recount pursuant to this chapter may conduct a recount by the following means:

(a) A manual tally of the ballots.

(b) A tabulation of the ballots on a computer using a software application designed to specifically count only the office or ballot question subject to the recount.

(c) A tabulation of the ballots on a computer using the same software application used in the precinct on election day.

(d) Any combination of methods in subdivision (a), (b), or (c), as determined appropriate by the board of canvassers.

(5) If a board of canvassers conducting a recount pursuant to this chapter intends to conduct a recount on a computer, the board of canvassers shall first test the software application by use of a test deck to determine if the program accurately counts the votes for the office or ballot question subject to the recount. If the test under this subsection fails to show that the software application accurately counts the votes for the office or ballot question subject to the recount, the board of canvassers shall use another means prescribed in subsection (4) to conduct the recount.
